AtoZ Group Limited

Manufacturing In Tanzania Since 1966

Founded in 1966, AtoZ Group Limited has grown from its roots in Tanzania into a diversified manufacturing group with operations spanning healthcare, textiles and garments, industrial and flexible packaging, agriculture, plastics, recycling, commercial property and logistics. With 8,000 employees, AtoZ combines six decades of manufacturing experience with modern technology, technical expertise, research and development, and large-scale production. The Group serves businesses, institutions, governments and development partners across Tanzania as well as regional and international markets.
At the heart of AtoZ is a commitment to manufacturing in Tanzania, creating local value, developing people and building products capable of competing in international markets.

AtoZ At A Glance

Quality, Certifications & Compliance

AtoZ holds Group-wide ISO 9001 (Quality Management), ISO 14001 (Environmental Management), and ISO 45001 (Occupational Health & Safety) certifications, supporting consistent quality, environmental responsibility and safe operations across the Group.

AfyaZ's medical-device operations additionally hold ISO 13485 (Medical Devices Quality Management) certification, operate WHO-aligned Good Manufacturing Practice (GMP) systems, and include EO sterilisation and validation. Full product traceability, barcoding and batch quality control are supported by microbiology and physical-testing laboratories.

Infrastructure & R&D Capability

AtoZ's integrated industrial estate is designed to support uninterrupted, compliant and large-scale production. The estate includes independent power generation and backup, water treatment and effluent management, mechanical and electrical engineering workshops and warehouses, internal logistics and fleet capability, and dedicated QA/QC laboratories.

The Group operates advanced research and development laboratories across two core units:

01 **Vector-Control R&D Unit:** WHO-aligned LLIN insecticide-efficacy testing, durability studies and field-performance studies.

02 **Agronomy & Post-Harvest Technology R&D Unit:** Grain-storage trials, climate-stress simulation and food-safety research.

Export & Regional Capability

AtoZ's manufacturing platform is built to serve customers beyond Tanzania. Large-scale local production, integrated logistics and export capability enable the Group to supply regional and international markets while maintaining dependable production and quality standards.

Corporate Social Responsibility & Sustainability

AtoZ's social and environmental impact is embedded across its core businesses rather than operated as a separate function. Its approach spans inclusive employment, public health, environmental stewardship, food security, community support and the development of Tanzania's future industrial workforce.

01 **Gender-Inclusive Employment:**
AtoZ is a major employer in Arusha and Tanzania. More than 60% of its workforce are women, reflecting a deliberate commitment to inclusive industrial development and women's economic empowerment.

02 **Public Health Impact:**
Through LLIN manufacturing, AtoZ has supported malaria-control programmes across Africa for more than 15 years in partnership with UNICEF, The Global Fund, WHO and USAID/PMI. Through SafePad, the Group extends this public-health impact into women's health and menstrual hygiene.

03 **Environmental Stewardship:**
AtoZ has invested in a dedicated recycling division using European recycling technology to reclaim and repurpose plastic waste into fully recyclable and reusable long-life bags. The Group also offers recyclable and biodegradable packaging options. Its operations are supported by ISO 14001 and ISO 45001 certifications, alongside OSHA compliance and relevant environmental and fire-safety licences.

04 **Food Security:**
Through AgroZ, AtoZ works to reduce post-harvest losses for smallholder farmers across Sub-Saharan Africa, addressing food security, farmer incomes and food safety. Its solutions include Aflasafe TZ01, a bio-control product designed to prevent aflatoxin contamination in crops including maize and groundnuts.

05 **Community Support:**
Community support is one of AtoZ's core values alongside innovation and excellence. The Group is committed to supporting and uplifting the communities in which it operates as part of its broader vision to create positive impact.

06 **Support for Working Mothers:**
AtoZ Group was the first company in Africa to introduce free automatic sanitary-napkin vending machines across all of its manufacturing facilities. The Group also operates a fully equipped on-site Child Care Centre providing free childcare for employees' children from two months to two years of age. In addition, every eligible new mother receives one litre of fresh milk every day for one year following childbirth.

07 **Academic & Industry Partnerships:**
AtoZ works closely with schools, colleges and universities to strengthen the connection between academia and industry. Each year, the Group welcomes students, researchers, academic institutions and government delegations to its manufacturing campus, providing practical exposure to advanced manufacturing, engineering, research, quality systems and sustainability. Through structured internships, industrial training programmes and mentorship, AtoZ supports the development of the next generation of engineers, scientists, technicians and business leaders while strengthening Tanzania's industrial capability.

Our Purpose

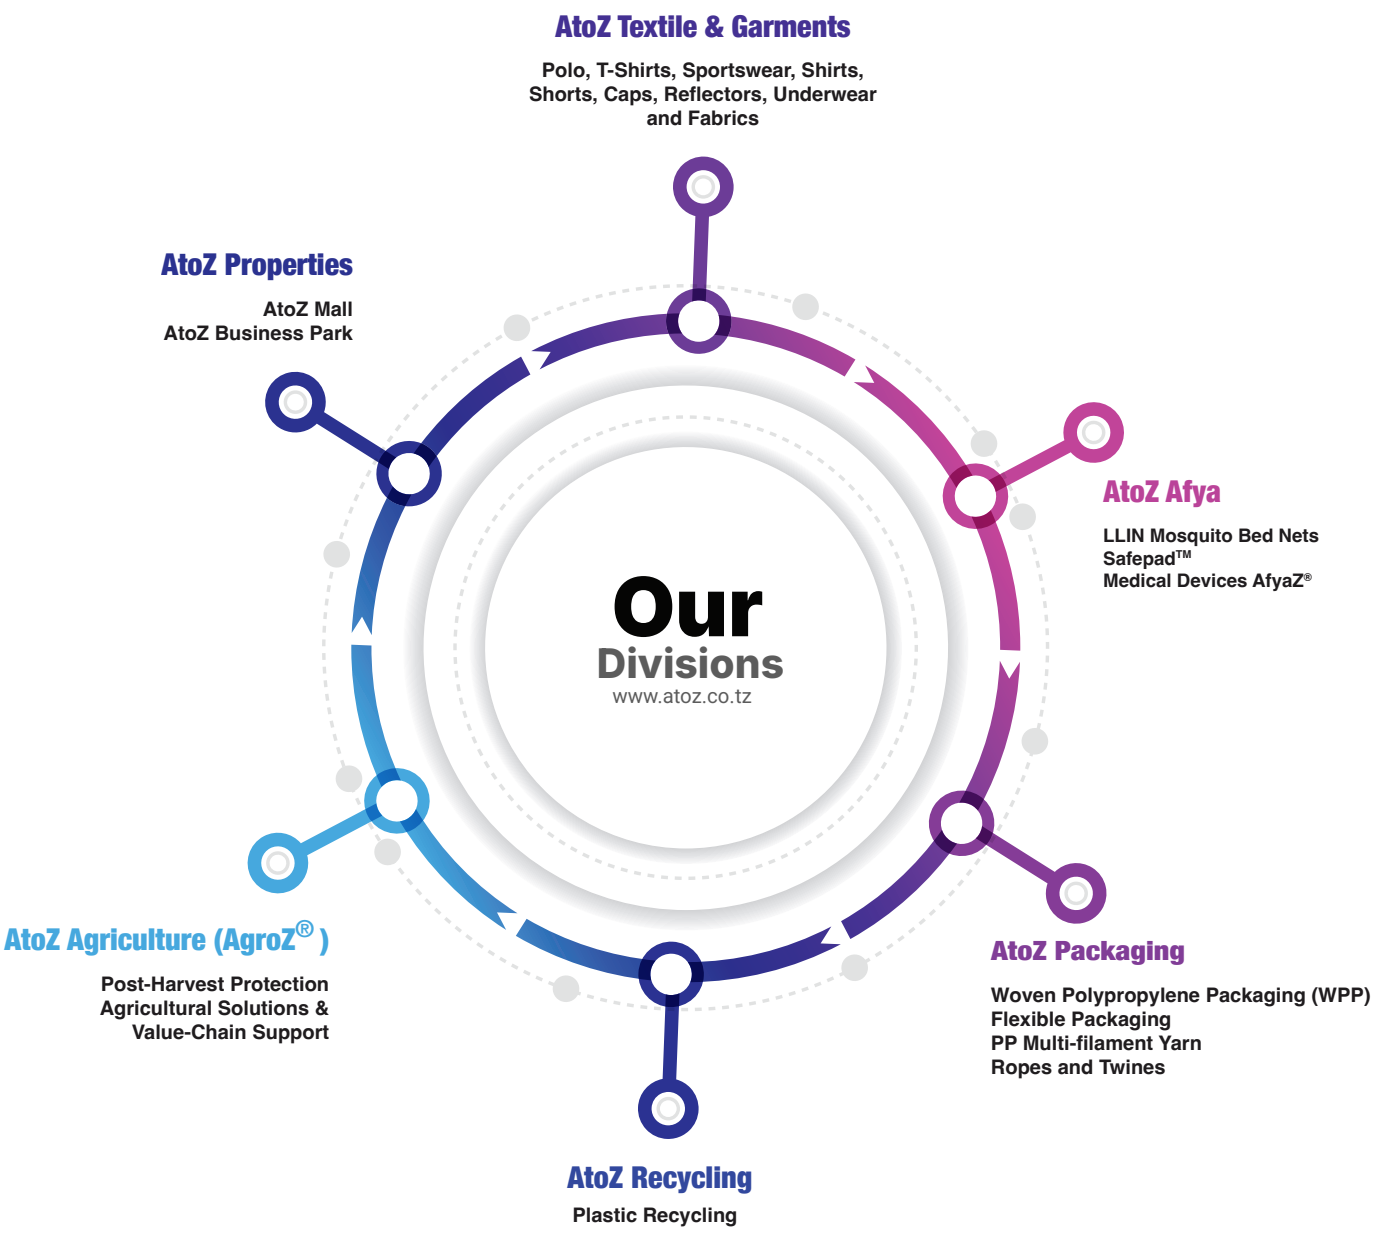

To build world-class products and businesses from Tanzania that create lasting value for our customers, our people, our communities and the markets we serve.

Made in Tanzania. Built for Africa. Ready for the World.

Developing Africa Through **Innovation & Manufacturing Excellence.**

LLIN Mosquito Bed Nets

Mira Net® | Olyset Net® | OlysetPlus®

LLIN Mosquito Bed Nets

Mira Net®

Mira Net®

Developed by our Africa Technical Research Center (ATRC) in Arusha, Tanzania, using alpha-cypermethrin as the active ingredient for enhanced efficacy.

Product Specifications
Material: Raschel knitted netting treated with alpha-cypermethrin
Shape: Rectangular
Available Colours: White or Blue
Packaging: 40 pieces per bale

Olyset Net®

Olyset Net®

Introduced in 2003 through a partnership with **Sumitomo Chemical Company (SCC) Japan**, this LLIN uses a four-fold protection system: bite inhibition, repellency, knockdown, and mortality.

Olyset Net

Product Specifications
Material: Raschel knitted netting treated with Permethrin.
Shape: Rectangular
Available Colours: White or Blue
Packaging: 40 pieces per bale

OlysetPlus®

OlysetPlus®

Our next-generation LLIN, offering superior protection and long-lasting performance for effective malaria prevention.

Product Specifications
Material: Raschel knitted netting treated with a combination of permethrin and PBO (piperonyl butoxide), for enhanced efficacy.
Shape: Rectangular
Available Colours: White or Blue
Packaging: 40 pieces per bale

OlysetPlus®
® Registered trademark of Sumitomo Chemical Co., Ltd.

Reusable and Antimicrobial Sanitary Pads

Number of Pads

Total Pads: 4 pads per box.

Variety:
3 Day Pads: Designed for daytime use.
1 Night Pad: Longer design for overnight protection.

Price

15,000 TZS per pack. (Retailer)
12,000 TZS per pack. (Wholesale)

Uniqueness and features

- Antimicrobial
- High absorbency
- No irritation
- Reusable
- Comfortable

How to wash

- **Soak:** Place the used pad in cold water with soap for 30 minutes.
- **Rinse:** Rinse thoroughly with clean water until the water runs clear.
- **Dry:** Hang to dry under direct sunlight or in a well-ventilated area.
- **Reuse:** Once fully dried, the pad is ready to be used again.

Important Care Tips:

- Do NOT use bleach.
- Do NOT iron the pads.
- Machine washable using cold water and detergent.

Medical Devices (AfyaZ®)

Medical Devices (AfyaZ®)

AfyaZ® is AtoZ's registered trademark for a comprehensive range of high-quality medical devices, including MDR Class IIa medical devices and IVDR Class A in vitro diagnostic (IVD) devices. Our products are manufactured in accordance with Good Manufacturing Practice (GMP) under a certified Quality Management System (QMS) and are produced in an ISO Class 8 cleanroom to ensure consistent quality, safety, and reliability. The AfyaZ® portfolio includes Auto-Disable (AD) syringes, Reuse Prevention (RUP) syringes, infusion sets, transfusion sets, blood collection tubes, and specimen collection containers, all of which are designed, manufactured, and marketed by AtoZ to meet applicable international regulatory and quality standards.

Blood Collection Tubes

Product Name	Cap Colour (ISO /Industry Standard)	REF No	Volume	UDI - DI / GTIN	TMDA Class	FDA Class	EU Regulation	CE Classification	Classification Rule / Justification	Intended Use
No Additive Blood Collection Tube	Red	ATOZBCT010	2 ml	6203016654586	A	Class II	IVDR	Class A	IVDR Annex VIII – Rule 5(c)	Intended for the collection, preservation and transport of blood to obtain serum for clinical laboratory testing. It allows the blood to clot naturally and the resulting serum is used for biochemistry, immunology, serology and toxicology.
No Additive Blood Collection Tube	Red	ATOZBCT011	3 ml	6203016654593	A	Class II	IVDR	Class A	IVDR Annex VIII – Rule 5(c)	Intended for the collection, preservation and transport of blood to obtain serum for clinical laboratory testing. It allows the blood to clot naturally and the resulting serum is used for biochemistry, immunology, serology and toxicology.
Clot Activator Blood Collection Tube	Red	ATOZBCT017	2 ml	6203016654609	A	Class II	IVDR	Class A	IVDR Annex VIII – Rule 5(c)	Intended for the collection and processing of blood to obtain serum, more rapidly. The clot activator accelerates the coagulation cascade and the serum is used for clinical chemistry, serology, immunohaematology and routine diagnostic testing.
Clot Activator Blood Collection Tube	Red	ATOZBCT002	3 ml	6203016654515	A	Class II	IVDR	Class A	IVDR Annex VIII – Rule 5(c)	Intended for the collection and processing of blood to obtain serum, more rapidly. The clot activator accelerates the coagulation cascade and the serum is used for clinical chemistry, serology, immunohaematology and routine diagnostic testing.
Clot Activator Blood Collection Tube	Red	ATOZBCT001	4 ml	6203016654401	A	Class II	IVDR	Class A	IVDR Annex VIII – Rule 5(c)	Intended for the collection and processing of blood to obtain serum, more rapidly. The clot activator accelerates the coagulation cascade and the serum is used for clinical chemistry, serology, immunohaematology and routine diagnostic testing.

Blood Collection Tubes

Product Name	Cap Colour (ISO /Industry Standard)	REF No	Volume	UDI - DI / GTIN	TMDA Class	FDA Class	EU Regulation	CE Classification	Classification Rule / Justification	Intended Use
Blood Collection Tube – EDTA K2	Lavender	ATOZBCT004	2 ml	6203016654456	A	Class II	IVDR	Class A	IVDR Annex VIII – Rule 5(c)	Intended for the collection, containment, preservation and transport of venous blood to obtain whole blood or plasma. EDTA binds calcium to prevent coagulation. The preserved specimen is used for hematology testing and HbA1c Testing .
Blood Collection Tube – EDTA K2	Lavender	ATOZBCT005	3 ml	6203016654463	A	Class II	IVDR	Class A	IVDR Annex VIII – Rule 5(c)	Intended for the collection, containment, preservation and transport of venous blood to obtain whole blood or plasma. EDTA binds calcium to prevent coagulation. The preserved specimen is used for hematology testing and HbA1c Testing .

EDTA binds calcium to prevent coagulation. The preserved specimen is used for hematology testing and HbA1c Testing .
Blood Collection Tube – EDTA K3	Lavender	ATOZBCT009	4 ml	6203016654500	A	Class II	IVDR	Class A	IVDR Annex VIII – Rule 5(c)	Intended for the collection, containment, preservation and transport of venous blood to obtain whole blood or plasma. EDTA binds calcium to prevent coagulation. The preserved specimen is used for hematology testing and HbA1c Testing .

Product Name	Cap Colour (ISO /Industry Standard)	REF No	Volume	UDI - DI / GTIN	TMDA Class	FDA Class	EU Regulation	CE Classification	Classification Rule / Justification	Intended Use
Blood Collection Tube – Lithium Heparin	Green	ATOZBCT014	2 ml	6203016654531	A	Class II	IVDR	Class A	IVDR Annex VIII – Rule 5(c)	Intended for the collection, processing, transport and storage of venous blood to obtain plasma. The lithium heparin anticoagulant prevents clotting by activating antithrombin. The plasma is used for chemistry determination and electrolyte analysis.
Blood Collection Tube – Lithium Heparin	Green	ATOZBCT015	3 ml	6203016654548	A	Class II	IVDR	Class A	IVDR Annex VIII – Rule 5(c)	Intended for the collection, processing, transport and storage of venous blood to obtain plasma. The lithium heparin anticoagulant prevents clotting by activating antithrombin. The plasma is used for chemistry determination and electrolyte analysis.
Blood Collection Tube – Lithium Heparin	Green	ATOZBCT016	4 ml	6203016654555	A	Class II	IVDR	Class A	IVDR Annex VIII – Rule 5(c)	Intended for the collection, processing, transport and storage of venous blood to obtain plasma. The lithium heparin anticoagulant prevents clotting by activating antithrombin. The plasma is used for chemistry determination and electrolyte analysis.

Infusion Set

With air vent & flow regulator

Product Name	Standard Colour Code	REF No	Volume	UDI - DI / GTN	TMDA Class	FDA Class	EU Regulation	CE Classification	Classification Rule / Justification	Intended Use
Infusion Set (with Air Vent & Flow Regulator)	N/A	ATOZIVS001	Regular	6203016654395	B	Class II	MDR	Class IIa	MDR Annex VIII – Rule 2	The infusion Sets are used to administer intravenous fluid and medicines into human circulating system by using intravenous catheter or cannula.

Blood Transfusion Set

Standard type

Product Name	Standard Colour Code	REF No	Volume	UDI - DI / GTI N	TMDA Class	FDA Class	EU Regulation	CE Classification	Classification Rule / Justification	Intended Use
Blood Transfusion Set (Standard Type)	N/A	ATOZBTS001	Regular/ Standard	6203016654388	B	Class II	MDR	Class IIa	MDR Annex VIII – Rule 2	BT/administration set is used to administer measured and regulated blood from a container (plastic bag or glass bottle) to a patient's vascular system through a needle or catheter inserted into a vein via gravity method.

Specimen Containers

Product Name	REF No	Volume	UDI - DI / GTIN	TMDA Class	FDA Class	EU Regulation	CE Classification	Classification Rule / Justification	Intended Use
Stool Specimen Collection Container (Leak-proof)	ATOZSTC001	60 ml	6203016654418	A	Class I	IVDR	Class A	IVDR Annex VIII – Rule 5	The Stool Specimen Container is a non-sterile, single-use, disposable medical device intended for the collection, storage, and transport of human fecal (stool) specimens to a laboratory or diagnostic facility for in vitro diagnostic testing example microbiology, parasite, etc. It is designed to protect the sample from contamination and leakage and maintain sample integrity during transport.
Urine Specimen Collection Container (60 mL)	ATOZUSC002	60 ml	6203016654425	A	Class I	IVDR	Class A	IVDR Annex VIII – Rule 5	The UrineSpecimen Container is a non-sterile, single-use, disposable medical device intended for the collection, temporary storage, and transport of human urine specimens for laboratory analysis and diagnostic procedures example microbiology, parasite, etc. It is designed to protect the sample from contamination and leakage and maintain sample integrity during transport.
Sputum Collection Container (Wide Mouth, 80 mL)	ATOZSPC003	80 ml	6203016654432	A	Class I	IVDR	Class A	IVDR Annex VIII – Rule 5(c)	The Sputum Specimen Container is a non-sterile, single-use, disposable medical device intended for the collection, temporary storage, and transport of human sputum specimens for laboratory analysis and diagnostic procedures example microbiology, parasite, etc. It is designed to protect the sample from contamination and leakage and maintain sample integrity during transport.

Syringe

Product Name	Standard Colour Code	REF No	Volume	UDI - DI / GTIN	TMDA Class	FDA Class	EU Regulation	CE Classification	Classification Rule / Justification	Intended Use
Auto Disable Syringe (Fixed Needle)	N/A	ATOZADS001	0.5 mL	6203016654340	B	Class II	MDR	Class IIa	MDR Annex VIII – Rule 6	Sterile Auto disable (AD) syringe with a needle is used for administration intramuscular/intravenous medicines of fixed dose immunization
Reuse Prevention Syringe (Luer Lock)	N/A	ATOZRPS001	2 mL	6203016654357	B	Class II	MDR	Class IIa	MDR Annex VIII – Rule 6	Sterile single use hypodermic syringes with Re-use prevention feature (RUP) intended to be used for reconstitution/administration of vaccines and infection prevention. The RUP mechanism may automatically detach the plunger once dose completed.
Reuse Prevention Syringe (Luer Lock)	N/A	ATOZRPS002	5 mL	6203016654364	B	Class II	MDR	Class IIa	MDR Annex VIII – Rule 6	Sterile single use hypodermic syringes with re-use prevention feature (RUP) intended to be used for reconstitution/administration of vaccines and infection prevention. The RUP mechanism may automatically detach the plunger once dose completed
Reuse Prevention Syringe (Luer Lock)	N/A	ATOZRPS003	10 mL	6203016654371	B	Class II	MDR	Class IIa	MDR Annex VIII – Rule 6	Sterile single use hypodermic syringes with re-use prevention feature (RUP) intended to be used for reconstitution/administration of vaccines and infection prevention. The RUP mechanism may automatically detach the plunger once dose completed.

Why AtoZ Packaging?

Local Manufacturing

Proudly produced within Tanzania to support regional business and reduce logistical hurdles.

Fast Delivery

Enjoy shorter lead times that keep your supply chain moving without unnecessary delays.

Tailored Branding

Stand out on the shelves with custom printing services built to match your brand's identity.

Global Reach

Expand your business effortlessly with robust, built-in export capabilities.

High Standards

Ensure absolute consistency and product reliability through strict quality control measures.

Expert Assistance

Access dependable technical support whenever you need help optimizing your packaging.

Massive Capacity

Scale your operations smoothly with high-volume, large-scale production power.

Africa **WPP Bags** Powerhouse

Largest WPP bag manufacturer in East, Central and Sub-Saharan Africa

Flexible Packaging Films

Laminated Films

Maximize Brand Impact & Product Freshness.

Elevate your product's shelf presence with stunning, premium-quality graphics while a powerful multi-layer shield locks out oxygen and moisture to keep your coffee, snacks, or detergents fresh for longer.

Key Industries and Applications

01

Food & Beverage:
Keep bread soft and mould-free with precision moisture control, prevent costly warehouse spills with heavy-duty sugar bags, and protect snack oils from going rancid using light-blocking linings.

02

Personal Care:
Guarantee your wet wipes never dry out on the shelf and ensure squeeze tubes survive daily consumer handling without cracking.

03

Medical & Pharma:
Ensure absolute patient safety and regulatory compliance with uncompromised, sterile, and airtight seals for pills and medical devices.

04

Home & Chemical:
Safely contain volatile or caustic chemicals without corrosive leaking, protecting both your handlers and your brand reputation.

Barrier Films

Extend Shelf Life & Eliminate Spoilage.

Drastically cut down on product waste and keep your perishable goods tasting exactly as intended. Our advanced barrier technology acts as an invisible vault, locking in flavours while completely blocking out light, moisture, and oxygen.

Key Industries and Applications

01

Bread Bags & Bakery:
Deliver a consistently fresh-baked experience by stopping baked goods from drying out or moulding prematurely.

02

Coffee, Snacks & Meat:
Preserve expensive aromas and delicate flavor profiles from degradation, ensuring your premium products taste exactly as intended.

03

Sugar & Dry Staples:
Stop product caking and dissolving in humid environments, ensuring your dry commodities pour perfectly every time.

04

Medical & Pharma:
Maintain an impenetrable, long-term shield against bacterial contamination for life-sensitive medical components.

Non-Barrier Films

Cost-Effective, Breathable Protection.

The ideal, lightweight solution to keep your garments clean, dust-free, and crisp during transit, or to allow fresh bakery items and produce to "breathe" preventing condensation and preserving crispiness without paying for unnecessary heavy barriers.

Key Industries and Applications

01

Fresh Produce & Bakery:
Maintain the perfect product texture letting hot artisan bread stay crispy instead of soggy, and allowing vegetables to breathe to eliminate slimy condensation.

02

Logistics & Shipping:
Secure multi-ton cargo and prevent shifting or collapsing during rough transit with ultra-reliable, high-stretch containment.

03

E-Commerce & Retail:
Lower your shipping overhead while ensuring online apparel orders arrive clean, dry, and professional-looking.

04

Industrial & Garment:
Safeguard pristine surfaces from scratches, dust, and handling smudges during manufacturing and final delivery.

BOPP Labels

Flawless Branding That Never Fades or Peels.

Keep your brand looking immaculate from the factory floor to the consumer's hands. Designed to run smoothly on high-speed lines without tearing, these ultra-durable, waterproof labels stay pristine and firmly attached even when submerged in ice or exposed to harsh oils.

Key Industries and Applications

01

Beverages:
Ensure your brand looks premium even at the bottom of an ice bucket guaranteed zero wrinkling, peeling, or fading in wet environments.

02

Food & Dairy:
Squeeze and bend without wrinkling the label, and endure deep-freezer environments without adhesive failure.

03

Personal Care:
Keep your branding flawless in soapy, oily, and steamy shower environments for the entire lifespan of the product.

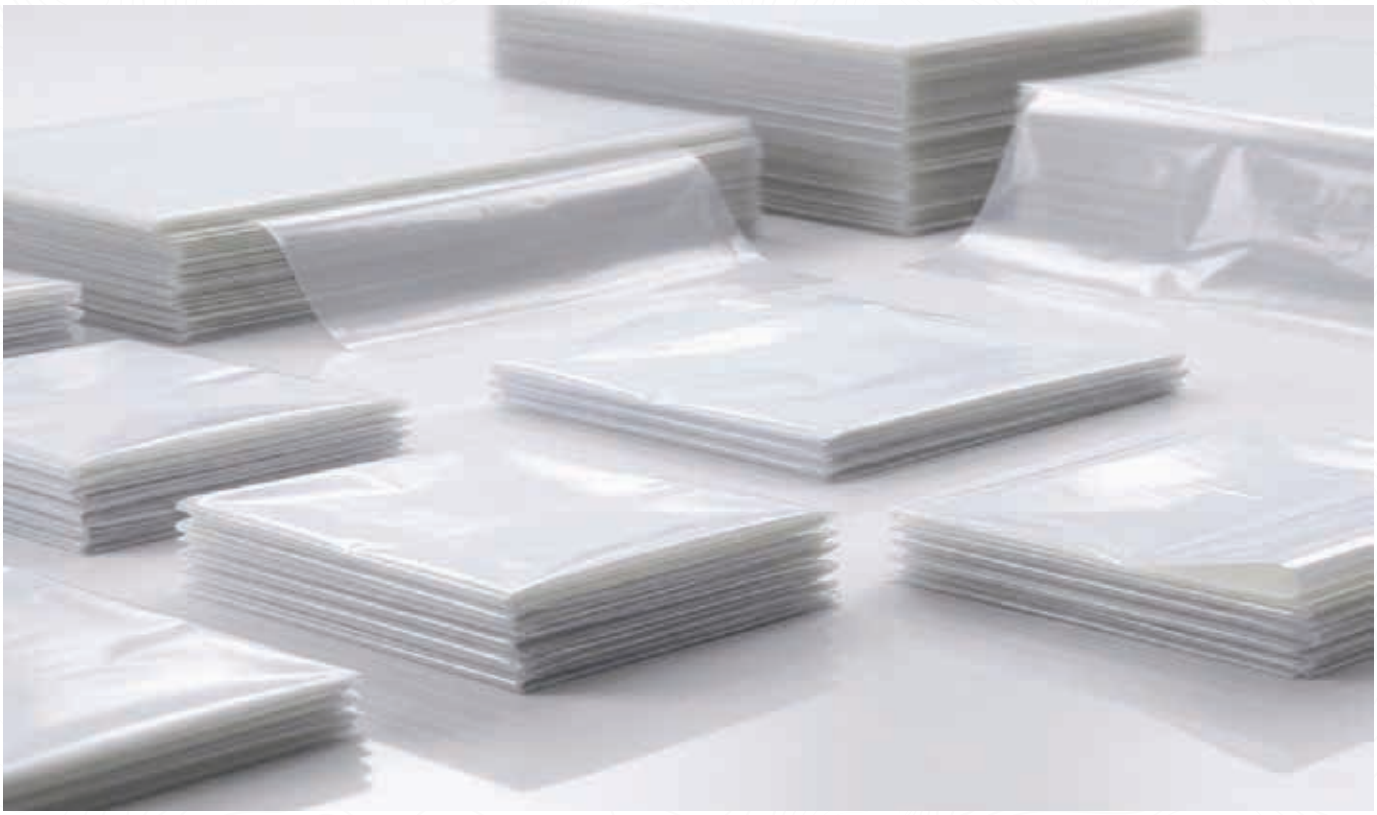

04

Industrial & Garment:
Protect crucial safety warnings and legal branding from bleeding or smudging when exposed to aggressive chemical drips.

PE Bags Liners

Heavy-Duty, Tear-Resistant Protection for Demanding Goods

These PE Bags completely eliminate the risk of embarrassing or messy ruptures. Engineered specifically to bear heavy weights, these bags provide rock-solid support for heavy dry goods, ice, or waste, ensuring worry-free transport and stacking.

Key Industries and Applications

01

Commercial Waste & Sanitation Management:
Provides heavy-duty, puncture-resistant containment for industrial facility waste, hospitality trash, and high-volume municipal disposal without the risk of messy failures.

02

Wholesale Ice & Cold Chain Logistics:
Offers leak-proof reliability for packaging, storing, and transporting bulk commercial ice blocks or cubes to restaurants and event venues.

03

Industrial Bulk Dry Goods:
Functions as a protective internal barrier inside larger sacks or boxes to safely transport dense raw materials, chemical powders, and agricultural supplies.

Pouches

Versatile, Secure, and Efficient Packaging for Every Industry.

Our advanced pouch solutions combine convenience, product protection, and efficiency. **Zip-Lock Pouches** offer stay-fresh resealability with a secure interlocking track that prevents spills and preserves product quality long after the first opening. **Spouted Pouches** deliver mess-free, easy-pour convenience with a flexible, shatterproof design and spill-proof caps ideal for liquids and squeezables. **Flat Pouches** provide pocket-sized portability and high-volume manufacturing efficiency, offering single-use perfection with easy-tear access.

Key Industries and Applications

01

Food, Beverage & Active Nutrition:
Preserves freshness, flavor, and portability for dry groceries, retail snacks, liquid purees, sports energy gels, and single-serve drink mixes using resealable zippers, pour spouts, and easy-tear flat pouches.

02

Household Cleaners & Eco-Refills:
Delivers durable, leak-proof containers for high-volume liquid soap and detergent refills reducing plastic use by up to 80% as well as secure storage for home essentials and hardware.

03

Cosmetics, Healthcare & Personal Care:
Offers sterile, spill-proof, and space-efficient packaging for single-use beauty samples, lotion serums, medical prep pads, and travel-sized toiletries.

Pillow Packs

Affordable Everyday Freshness and Unbeatable Value.

Pillow packs offer the absolute lowest production cost per unit to keep retail prices highly competitive for consumers. They enable lightning-fast automated filling speeds for producers and utilize a lightweight protective barrier (like a nitrogen flush) to keep everyday snacks perfectly crisp.

Key Industries and Applications

01

Resealable Retail Snacks:
The ultimate cost-efficient choice for chips, popcorn, and crackers, perfectly supporting nitrogen-flush technology to prolong shelf life and prevent crushing.

02

Instant Food & Beverage Mixes:
Preserves individual coffee sticks, powdered drink mixes, and seasoning blends with clean-tear notches for instant, mess-free opening.

03

Medical & Hygienic Supplies:
Provides an airtight, sterile environment for single-use wet wipes, alcohol prep pads, and medical-grade components

Industrial & Specialized Bags

AD Star or Valve Block Bottom Bags

Optimized Storage & Zero-Tear Durability.

Save valuable warehouse space and cut down on product loss during transport. These rugged, brick-shaped bags stack perfectly flat without slipping and are practically indestructible when dropped, making them the global gold standard for cement, flour, and bulk grains.

Key Industries and Applications

01

Construction & Building Materials:
Slash material loss on rugged jobsites with a globally trusted design that won't burst, even when roughly dropped from trucks.

02

Agriculture & Staples:
Keep high-volume agricultural stock perfectly dry and clump-free during long storage cycles in challenging

03

Animal & Pet Food:
Turn high-volume feed bags into a powerful marketing tool with neat, self-standing displays that stay vertical and look professional.

04

Chemicals & Minerals:
Contain aggressive chemical resins completely securely with zero risk of ambient tearing or expensive contamination.

BOPP Laminated Bags

Industrial Strength Meets Photographic Luxury.

Give your premium food or pet food brands the retail edge they deserve. Get the unstoppable burst-resistance of a heavy-duty woven bag combined with high gloss, photo quality imagery that commands attention on retail shelves while stopping internal fats and oils from seeping through.

Key Industries and Applications

01

Pet Care & Food:
Prevent ugly, greasy staining on your outer packaging while commanding a premium retail price tag with a stunning aesthetic.

02

Consumer Food Staples:
Completely eliminate fine flour or sugar dust leakage on retail shelves, ensuring a clean and premium customer interaction.

03

Agriculture & Seed:
Safeguard expensive, treated hybrid seeds from moisture activation, ensuring maximum germination rates for your farming customers.

Shopping Bags (Woven and Non-Woven)

Turn Every Purchase Into a Lasting Brand Advertisement.

Provide your customers with ultra-reliable, high-strength carrier bags that they will proudly reuse again and again, keeping your brand top-of-mind long after they leave your store.

Custom Cut Options For Your Business

01

W-Cut Bags Woven and Non-Woven (Classic Grocery Style): Engineered for fast-paced, high-volume checkout lines, these traditional handled bags offer a familiar and reliable solution for supermarkets and daily grocery needs.

02

D-Cut Woven and Non-Woven Bags (Sleek Punch-Hole Handle): Give your boutique or retail brand an upscale, modern edge with a clean, built-in punch-hole handle that provides a premium shopping experience.

03

Box-Cut Woven and Non-Woven Bags (Maximum Retail Volume): Maximize your packaging capacity to easily accommodate bulky or large items, giving your customers the space they need for heavy retail hauls.

W-Cut Bag D-Cut Bag Box-Cut Bag

Stitched Bags

Breathable, Heavy-Duty Supply Chain Protection.

Safely harvest, store, and transport bulk crops like coffee, rice, and maize. The tightly stitched weave provides maximum weight capacity while allowing natural ventilation preventing moisture buildup, mould, and crop rot during long-haul shipping.

Key Industries and Applications

01

Animal Feed & Farming Supplies: Safely holds large, heavy volumes of livestock feed pellets, bran, and chemical fertilizers (often paired with an inner plastic liner to prevent leakage).

02

Construction & Flood Control: Heavy-duty construction makes them ideal for packing sand, gravel, and stone aggregates, as well as filling emergency sandbags for flood defense.

03

Agriculture & Bulk Crops: The ultimate standard for farm-level harvesting and shipping of grains, maize, beans, raw coffee beans, and tea leaves because the ventilation prevents moisture buildup and rot.

04

Wholesale Food Staples: Tightly stitched woven sacks securely transport bulk commodities like wholesale flour, salt, and sugar sacks without bursting during handling.

Jumbo Bags

Streamline Your Bulk Logistics.

Cut down on handling times and maximize shipping efficiency. Move up to 1.5 tons of mining materials, agricultural goods, or chemicals at once using integrated heavy-duty lifting loops designed for seamless forklift operation.

Key Industries and Applications

01

Mining & Minerals:
Handle extreme weights safely, transport tons of dense ores and mined concentrates with zero risk of structural failure.

02

Agriculture & Bulk Food:
Drastically accelerate bulk loading and unloading times, slashing labor overhead across your entire milling facility.

03

Construction & Infrastructure:
Keep job sites immaculately organized and safe by consolidating tons of rubble or raw materials into compact, hoistable footprints.

04

Chemical & Petrochemical:
Comply with critical safety mandates using specialized UN-rated builds to move hazardous materials with zero environmental leakage.

Ropes & PP Multi-Filament Yarn

Ropes & Twines

Unbeatable Knot Security and Weatherproof Reliability for Tough Jobs

Engineered to deliver heavy-duty load support and excellent knot-holding capabilities, these ropes and twines will not slip or snap under sudden tension. Their specialized construction blocks UV degradation, water absorption, and fraying, giving you total peace of mind whether you are bundling cargo, securing assets, or tying down farm yields.

Key Industries and Applications

01

Agriculture & Crop Trellising:
Used extensively for tying, staking, and supporting heavy climbing crops like tomatoes, as well as binding hay bales securely.

02

Commercial Packaging & Bundling:
Offers quick, heavy-duty bundling solutions for industrial boxes, construction materials, and wholesale retail packages.

03

Logistics & Cargo Securing:
Provides reliable, weather-resistant tie-downs for securing commercial goods on trucks, pallets, and marine shipping transport.

PP
Multi-Filament

High-Strength, Vibrant Performance Engineered for Flawless Production

This ultra-flexible and durable yarn offers exceptional tensile strength and wear resistance, ensuring it can handle high-speed automated sewing and weaving without snapping. It is completely resistant to moisture, rot, and chemicals, giving your products a long-lasting, professional finish that retains its vibrant colour under demanding conditions.

Key Industries and Applications

01

Industrial Bag Sewing:
Used as a high-strength closing thread for securing industrial sacks, woven polypropylene bags, and geotextiles.

AgroZ®

By the Farmers' Side

Product Catalogue

Crop Production & Horticulture Solutions

AgroZ® Net 09

AgroZ® Net is recommended for building low cost greenhouse and net houses that helps to increase vegetable yield up to 40%, while reducing pesticides up to 80%.

AgroZ® Shade Net

- Shade: 30%, 40%, 55%, 75% & 90%
- Dimensions: 2m x 100m or 4m x 50m
- Colour: Black & Dark Green

AgroZ® Net 04

AgroZ® Net is recommended for building low cost greenhouse and net houses that helps to increase vegetable yield up to 40%, while reducing pesticides up to 80%.

AgroZ® Ground Cover

- Up to 75% moisture preservation
- Suppresses weeds
- Crops can be harvested 7 to 21 days earlier
- Up to 3 times enhanced yields
- Improved crop quality
- Cleaner produce
- Increased size
- Can be used to grow a second or third crop with minimum inputs

AgroZ® Trellising Twine

Keeps crops off the ground whilst increasing usable space and yield. Prevents fruit rotting Increases plants' exposure to sunlight, encouraging plant growth and good yield Promotes healthy crops Enables proper circulation, reducing the spread of diseases

AgroZ® Nursery Bags

These are heavy-duty, white planter bags with handles, used for growing larger seedlings or saplings in a nursery setting before permanent planting.

AgroZ® Seedling Trays

AgroZ® Seedling Trays are specialized horticultural containers designed to facilitate organized seed germination and healthy root development in a controlled environment. By providing individual cells for each plant, they ensure uniform growth and significantly reduce transplant shock when moving seedlings to the field.

AgroZ® Greenhouse sheet

Use to cover the Greenhouse or net house top for protection against rain and direct sun light. It's translucent and allows light to pass.

AgroZ® Bird Net

A durable, effective, and long-lasting discrete barrier for premises protection that is harmless to birds.

Post-Harvest Handling & Storage Solutions

AgroZ® Aflasafe TZ01™

AgroZ® Aflasafe TZ01™ is a natural bioprotectant that is an effective product against pre-harvest crop contamination with aflatoxins. Aflasafe cuts aflatoxin in maize and groundnut by 80% to 100%, down to levels that are safe to eat.

AgroZ® Kamba

AgroZ® Kamba, a brand of durable agricultural ropes available in various coil sizes. These ropes are specifically designed for farm use, such as securing loads or providing structural support for climbing crops.

AgroZ® Plastic Sheet

Our plastic sheeting can be used to separate areas or volumes , hold items, serve as barriers or as printable surfaces. Single and double colours available. Size up to 2400mm, with thickness from 20 to 150 microns of 80 to 591 gauges. Durable and high quality continuous polymeric material sheets. They are suitable for agriculture and construction.

AgroZ® Aroma Bag

Preserves the natural aroma in arabica coffee, tea and spices can be used for multiple seasons. Frequently used for packaging & transportation of green beans arabica coffee in a container on the high sea to avoid contamination and preserving the natural flavour.

Size: 76cm X 130cm
60cm X 110cm
Thickness: 80 micron
Composition: Polyethylene (PE) & Barrier Layers

AgroZ® Tarpaulin

Use to dry and protect crops
Important for prohibiting the crops from becoming dirty and infected
The crops can be easily covered when there is rainfall, thereby protecting the crop from mould.

AgroZ® Tea Harvesting Bag

Efficient in harvesting transportation with minimum losses
Keeps the tea leaves fresh.

AgroZ® Crate

Structural design allows for stacking and nesting
Equipped with ventilation holes which allow for adequate air flow through produce.

Dimensions:
60cm W x 41cm L x 37cm H
Can hold 18kg French beans, 25kg tomatoes & 30kg Avocado or Mangoes

AgroZ® Silage Bag

This AgroZ® silage bag offers smallholder farmers a cost-effective, UV-protected solution for rapidly preserving forage with minimal nutrient loss. The durable 150-micron, white-and-black LDPE design eliminates spoilage from bacteria and mould, allowing for convenient on-farm storage.

Dimensions: 1.0m x 2.5m

AgroZ® Bag Plus

AgroZ® Bag Plus is a water-resistant and gastight solution for a vast range of dry agricultural commodities. It comes with an inner liner and an outer woven Polypropylene (WPP) raffia sack.

AgroZ® Mfuko Safi

AgroZ® Mfuko Safi is a hermetic, triple-layer storage bag. It is used by smallholder farmers to safely store agricultural grains and seeds for months without the need for chemical insecticides.
Triple-Layer Design: The bag features two thick, high-density polyethylene (HDPE) inner liners and a tough, woven polypropylene outer sack.
Hermetic Seal: The inner liners are tied off separately, completely sealing the contents. This traps the grain and cuts off the oxygen supply.
Natural Pest Control: The lack of oxygen causes any insects or larvae inside the bag to die naturally.

AgroZ® Leno Bags

AgroZ® Leno bags are a standard solution for packaging and transporting produce, preventing moisture and providing good ventilation to extend the shelf life of onions and potatoes by more than 50%.

Farm Tools & Equipment

AgroZ® Maize Sheller

The AgroZ® Maize Sheller is a crucial component of our comprehensive value chain support for smallholder farmers. This affordable and user friendly handheld tool is specifically designed for efficient maize shelling, providing an essential solution for farmers.

AgroZ® Knapsack Sprayers

AgroZ® Knapsack Sprayers are manual, backpack-mounted pressure sprayers designed for the precise application of liquid fertilizers, herbicides, and insecticides across various farm sizes. These durable red sprayers feature an ergonomic design and adjustable nozzles to help farmers achieve uniform coverage while protecting their crops.

AgroZ® Watermelon Cradle

Air Circulation for Even Ripening: Elevates fruits for air circulation, promoting even ripening and minimizing rot.
Effective Size and Versatility
Suitable for various small to medium fruits.

Agrochemicals

Celphos (Aluminium Phosphide 57% FT)

Celphos is a powerful fumigant tablet containing 57% Aluminum Phosphide, primarily used for controlling insect pests in stored grains and packed commodities. Because it releases toxic gas upon exposure to moisture, it must be handled with extreme caution and kept strictly out of reach of children.

Glycel (Glyphosate 41% SL)

Glycel is a non-selective, systemic herbicide containing 41% Glyphosate that is used to control a broad spectrum of annual and perennial weeds. It works by moving through the plant's vascular system to the roots, ensuring the entire weed is destroyed rather than just the surface foliage.

Mupacron (Profenofos 50% EC)

Mupacron is a concentrated insecticide featuring Profenofos 50% EC, designed to eliminate chewing and sucking pests on various crops. It acts as both an insecticide and an acaricide to provide broad-spectrum protection for high-value produce like tomatoes.

Glyphosate (Isopropytamine Salt 41%)

Glyphosate is a non-selective, systemic herbicide containing 41% Glyphosate that is used to control a broad spectrum of annual and perennial weeds. It works by moving through the plant's vascular system to the roots, ensuring the entire weed is destroyed rather than just the surface foliage.

AtoZ Properties

AtoZ Mall & AtoZ Business Park

AtoZ Mall

Welcome to AtoZ Mall – Arusha's Premier Commercial Destination.

Strategically located in the bustling commercial heart of Posta Meru, Arusha, AtoZ Mall stands as a landmark of modern architecture and business innovation. Recently redesigned for extensive renovations to meet international standards, this premier multi-story development seamlessly merges vibrant, high-traffic retail environments with sophisticated professional corporate spaces.

Designed with modern businesses in mind, AtoZ Mall is intelligently zoned across three distinct levels to optimize foot traffic, maximize brand visibility, and foster a productive corporate culture:

Ground Floor | The Retail Hub: Engineered for high foot traffic and maximum accessibility, hosting over 20 distinct retail units ranging from boutique spaces to prominent, high-visibility corner shops.

First Floor | Showrooms & Anchor Stores: Featuring 11 expansive, large scale layouts engineered for maximum visibility perfectly suited for flagship showrooms and anchor tenants.

Second Floor | The Corporate Zone: A refined environment featuring 11 professional suites and service-oriented spaces designed for privacy, operational excellence, and corporate prestige.

Whether you are looking to launch a flagship retail store, expand a boutique brand, or establish a commanding corporate headquarters, AtoZ Mall offers the ideal canvas for your business to grow and thrive in Arusha.

Join Us at AtoZ Mall.

AtoZ Business Park

Welcome to the Commercial & Logistics Hub.

Strategically designed to meet the dynamic needs of modern trade, retail, and corporate operations, this premium business center offers a versatile, fully integrated commercial ecosystem. Designed to combine high visibility retail fronts with specialized office infrastructure and heavy duty logistics facilities, this development serves as an all in one destination for businesses looking to scale their operations.

The property is intelligently structured into four distinct commercial zones to ensure maximum operational efficiency, premium accessibility, and dedicated space for every aspect of your business:

Retail Fronts | Single Shops: Positioned on the side road featuring durable solid tarmac surroundings, these independent units offer an efficient 37m² layout complete with communal toilet facilities.

Premium Retail | Double Story Shops: Commanding a prime position on the main road, these expansive 110m² split level retail spaces feature a private internal staircase and a dedicated indoor toilet in each shop.

Corporate Suites | Office Spaces: Housed within a dedicated floor building totaling 765m² of unfurnished space, this zone features executive offices, 4 professional boardrooms, a tweny five desk communal office, two large showrooms, parking with 24/7 security, and comprehensive amenities including a kitchen, toilets, a bedroom, a filing room, and a prayer room.

Logistics & Storage | Modern Godowns: A secure, fully refurbished logistics complex featuring 24/7 security, washroom facilities, and a diverse range of high-capacity warehouse layouts of 700m² plus
Whether you require a high traffic retail storefront, a prestigious corporate headquarters, or large scale warehouse distribution storage, this premium business center provides the complete structural foundation for your enterprise to excel.

The Ultimate Solution to Your Logistic Problems

Get to Know us.

Fast Freight Forwarders Ltd (FFF), an associate company of AtoZ Group Ltd, is a leading logistics and transportation service provider in Tanzania. Established in 2011, FFF operates a **modern fleet of over 150 trucks, ranging from 6 to 30 tons,** delivering efficient and reliable transport solutions across East and Southern Africa.

We specialize in **containerized and loose cargo transportation, fuel logistics, crane hire, and abnormally wide cargo** handling. Our vertically integrated structure includes a fully equipped workshop and skilled maintenance team, ensuring our fleet remains in top condition and minimizing downtime.

At FFF, we're powered by a dedicated team of professionals who maintain clear and consistent communication with our customers providing updates, transparency, and peace of mind throughout every delivery.

With a strong commitment to **professionalism, reliability, efficiency, and customer satisfaction,** we ensure every consignment reaches its destination safely and on time.

Our Services

Local & Cross-Border Transportation

Reliable cargo transport across Tanzania and neighboring countries, including Kenya, Uganda, Rwanda, Zambia and Malawi.

Containerized & Loose Cargo Handling

Safe movement of both containerized and non-containerized goods, customized to suit your load requirements.

Fuel & Hazardous Material Transportation

Specialized fuel tankers and trained drivers ensure the safe and compliant delivery of petroleum and other sensitive materials.

Fleet Management & Logistics Support

End-to-end logistics planning, vehicle tracking, and route optimization for smooth, efficient operations.

Why Work with Us?

RELIABLE

We keep our promises. With a strong track record of on-time deliveries, you can depend on us to move your cargo safely and efficiently, wherever it needs to go.

EFFICIENT

Our modern fleet and skilled team ensure fast, secure, and cost-effective logistics solutions designed to save you time and resources.

PROFESSIONAL

From planning to delivery, we uphold the highest standards of service, ensuring your cargo is handled with precision and care every step of the way.

TRUSTED

We've earned the confidence of clients across East and Southern Africa through consistent performance, integrity, and long-term partnerships.
